

Mobile LPG Dispenser with Mechanical Metering

This mobile LPG dispenser is designed for the efficient and safe transfer of Liquefied Petroleum Gas. It features a mechanical metering system, valves, hoses and connections, and is mounted on a mobile cart for portability.

Overview

Mobile LPG Dispenser Solution

The MLD-50 is a mechanical mobile LPG dispenser engineered for the efficient and safe transfer of Liquefied Petroleum Gas. Mounted on a heavy-duty cart with integrated wheels, this unit provides exceptional portability for industrial and commercial applications. It utilizes a reliable mechanical metering system to ensure accurate dispensing, supported by a robust construction designed to withstand demanding operational environments.

Technical Specifications

Metering System	Mechanical
Portability	Yes
Primary Application	Industrial, Commercial, LPG Transfer

Equipment Features

Included Components

- Mechanical Meter
- Control Panel
- Dispensing Valves
- Hoses
- Mobile Cart with Wheels
