Overview

A robust, portable gantry crane designed for versatile warehouse and workshop material handling.

Versatile Material Handling Solution

This portable mobile gantry crane is engineered for efficient lifting, loading, and maintenance tasks in small to medium-sized factories, warehouses, and workshops. Featuring an omni-directional, portable design, it allows for quick assembly and easy transport between different work areas. Built with robust Q235 steel and high-quality components, it offers a flexible, motorized or manual solution for handling loads ranging from 0.5 to 10 tons.

Technical Specifications

Lifting Capacity

0.5 Ton

Minimum Capacity

10 Ton

Maximum Capacity

Material

Q235 Steel

Wheel Material

Polyurethane

Compatible Hoist Types

Wire Rope Electric Hoist, Electric Chain Hoist

Features & Benefits

Key Advantages

- Omni-directional mobility for flexible positioning
- Motorized travelling option available for efficiency
- Compact design for easy disassembly and transport
- Customizable size and rated load capacity
- Suitable for indoor and outdoor applications
