

Mobile Phone Battery Charger

This battery charger is designed for mobile phones. It efficiently charges the phone's battery, ensuring the device is ready for use.

Product Overview

Sustainable Hybrid Power Solution

This hybrid power generator is engineered to provide a reliable and sustainable energy source by combining solar and wind harvesting technologies. Featuring an integrated design with a wind turbine and solar panel, it is optimized for consistent power generation even in variable weather conditions. This system is an ideal solution for off-grid applications, including remote locations, street lighting, and supplemental power needs.

Technical Specifications

Primary Use Cases

- Off-grid power supply
- Street lighting
- Small electronic device charging
- Remote location power

Key Features

Integrated Design • Weather Resistant • Renewable Energy • Pole-Mounted

Energy Sources

Solar, Wind
