

Mobile Phone Camera Module

This compact camera module is designed for integration into mobile phones. It features a square lens housing with a circular lens element and a flexible flat cable (FFC) connector.

Overview

High-Precision Mobile Camera Module

This compact camera module is engineered specifically for seamless integration into mobile phones and portable electronic devices. Featuring a robust square lens housing and a circular lens element, it is designed for reliable image capture. The module includes a flexible flat cable (FFC) connector for efficient data and power transmission, supporting advanced functionality such as autofocus.

Technical Specifications

Component Type

Camera Module • Mobile Accessory

Model Identifier

DL200-

Key Features

Autofocus, Compact Design, FFC Connector

Production Code

061016
