

# Mobile Phone Charger Component Mold

This high-precision mold is designed for manufacturing components of mobile phone chargers. It is constructed from durable materials and features multiple cavities for increased efficiency and consistent quality.

## Product Overview

### High-Precision Injection Molding Solution

This high-precision mold is engineered specifically for the manufacturing of mobile phone charger components. Designed to produce parts with tight tolerances and an excellent surface finish, it ensures consistent quality for high-volume production cycles. The multi-cavity design enhances manufacturing efficiency, while the durable construction guarantees long-lasting performance across diverse injection molding environments.

## Technical Specifications

### Production Scale

High-Volume Compatible • Multi-Cavity Design

### Machine Compatibility

- Various injection molding machines
- Customizable to specific design requirements

### Application

Mobile Phone Charger Components

## Performance Metrics

### Key Performance Indicators

**499 units**

Cavity Count Capacity
