

# Mobile Piston Air Compressor for Mining

This piston air compressor is designed for mining applications. It features a robust engine, twin air tanks, and wheels for portability.

## Product Overview

### Heavy-Duty Mobile Piston Air Compressor

This robust mobile piston air compressor is specifically engineered for demanding mining applications. It features a heavy-duty engine paired with a multi-piston compressor unit, ensuring reliable power for pneumatic tools and equipment in rugged environments. Designed for portability, the unit includes durable wheels for easy maneuvering and an integrated pressure gauge for precise output monitoring.

## Key Performance Metrics

### Portability Features

Wheeled Chassis • Mobile Design

Application	Mining, Pneumatic Tools, Heavy-Duty Construction
-------------	--

## Technical Details

Compressor Type	Multi-Piston
Monitoring	Yes
Tank Configuration	Twin Air Tanks
