Product Overview

Efficient Bulk Material Handling

This mobile port hopper is engineered for the efficient loading and unloading of bulk materials, including coal cinder, cement powder, and iron powder. Designed for versatility, it features an integrated discharge system and is compatible with dust catchers, electric hydraulic doors, and vibrant supplying material devices to maximize operational efficiency. Built from heavy-duty steel, this solution is designed to minimize dust emissions while ensuring durability in demanding port environments.

Operational Capabilities

Integrated Systems

- Dust catcher
- Electric hydraulic door
- Vibrant supplying material devices

Compatible Materials

Coal Cinder, Cement Powder, Iron Powder, Grains, Aggregates

Design & Construction

Mobility

Yes

Construction Material

Heavy-duty steel

Safety & Maintenance

Safety Features

Access platforms • Safety railings • Inspection stairs
