

Mobile Power Station, 20kW-1000kW

This mobile power station is designed for versatile power generation, offering outputs from 20kW to 1000kW. It is mounted on a trailer, providing easy transportation and deployment for applications such as construction sites and emergency power backup.

Product Overview

Mobile Power Solution

This versatile mobile power station is engineered to meet diverse electricity needs in demanding environments such as construction sites, railway projects, and temporary remote locations. Featuring a trailer-mounted design with integrated safety systems including hand and air brakes, the unit ensures easy transport and rapid deployment. Available in a wide power range from 20kW to 1000kW, it offers customizable performance to match specific operational requirements.

Performance Specifications

Power Output Range

20 kW

Minimum Power

1000 kW

Maximum Power

Engine Compatibility

Cummins, Shangchai, Weichai, Jichai, Deutz, Volvo, Benz, Rolls Royce

Design and Mobility

Mobility and Safety

- Trailer-mounted design
- Integrated hand brake system
- Integrated air brake system
- Road-compliant rear light systems
- High-security enclosure
- Weather-resistant sealing
