

Mobile Projector Stand with Adjustable Bracket

This mobile floor stand is designed to securely hold and position a projector. The stand includes an adjustable projector bracket that can be tilted and rotated for optimal viewing angles.

Overview

Professional Mobile Presentation Solution

This mobile floor stand is engineered to securely support interactive whiteboards and projectors in dynamic environments like classrooms and conference rooms. Featuring a robust metal frame with smooth-rolling casters, it offers exceptional mobility and stability during presentations. The integrated design includes an air-cylinder mechanism for effortless height adjustment and a versatile bracket system compatible with various display sizes.

Technical Specifications

Compatible Display Size	80 inch to 100 inch
Height Adjustment	Air cylinder assisted
