

Mobile Radio Antenna

This mobile radio antenna is designed for use in vehicles and other mobile applications. It provides enhanced signal strength and range for communication devices.

Product Overview

Mobile Radio Antenna Series

This collection of mobile radio antennas is engineered for reliable communication in diverse mobile environments. Featuring a wide range of models designed for specific frequency bands and mounting requirements, these units provide enhanced signal strength and range for vehicle-based communication systems. Built with durable materials, they offer robust performance for professional applications.

Technical Details

Model Range

- JBA-227
- JBA-230
- JBA-236
- JBA-228
- JBA-237
- JBA-246
- JBA-247
- JBA-275-1
- JBA-279
- JBA-271
- JBA-272
- JBA-261
- JBA-273-1
- JBA-260
- JBA-276

Mounting Styles

Magnetic Base, Fixed Mount

Application

Key Benefits

Enhanced Signal Strength • Extended Range • Durable Construction

Primary Use

Vehicles and mobile communication systems
