

Mobile Scissor Car Lift for Auto Repair

This mobile scissor car lift is designed for automotive maintenance and repair. It features a robust scissor mechanism and portable power unit for flexible positioning.

Product Overview

Professional Mobile Scissor Lift

The QJY-K2800 is a versatile, mobile scissor car lift engineered specifically for professional automotive maintenance and repair environments. Its robust scissor mechanism provides stable lifting power, granting technicians clear and safe access to a vehicle's undercarriage. Designed with a portable, wheeled power unit connected via hydraulic lines, this system offers exceptional flexibility for shops looking to optimize floor space and workflow efficiency.
