

Mobile Screw Compressor Unit

This mobile unit features a screw compressor for efficient air compression. It is designed for installation on vehicles or boats for mobile applications.

Product Overview

Mobile Industrial Compressor Unit

This specialized mobile unit is engineered for high-pressure industrial applications, featuring a robust tracked chassis for superior mobility across varied and difficult terrain. Designed for versatility, the unit includes a high-capacity cannon apparatus suitable for firefighting or industrial foam deployment. Its compact, tracked design ensures that critical pumping power can be delivered directly to the point of need.

Technical Specifications

Primary Application

Firefighting • Industrial Pumping

Model Designation

LUF 60

Mobility System

Tracked Chassis, Mobile
