Overview

Autonomous Mobile Surveillance & Lighting

This self-contained, mobile solar tower provides a robust, off-grid solution for remote security and lighting. Designed for rapid deployment, it integrates solar-powered batteries with a high-efficiency LED lighting system and CCTV surveillance capabilities. It is an environmentally friendly, cost-effective alternative to traditional diesel-powered towers for construction sites, events, and remote monitoring.

Technical Features

Power Source	Solar Energy, Battery Powered, Off-Grid
Mast Material	Aluminum
Deployment	Mobile Trailer Chassis

Operational Capabilities

Core Functions

- CCTV Surveillance
- LED Lighting
- Remote Monitoring
- Telescoping Tower Mechanism

System Performance

900 ULT-Series

Model Capacity
