

Mobile Surgical Vehicle

This mobile operating vehicle is designed for field medical operations. It is equipped to serve as a mobile surgical unit, providing on-site medical support.

Overview

Mobile Surgical Vehicle

This mobile surgical vehicle is a specialized unit engineered for field medical operations and emergency response. Built on a robust chassis, it serves as a self-sufficient medical facility capable of operating in remote locations. It integrates advanced surgical equipment within a custom-built body, ensuring timely and professional medical support where traditional facilities are inaccessible.

Technical Specifications

Gross Vehicle Weight	18245 kg
----------------------	----------

Operational Capabilities

Design Features

- Robust chassis construction
- Custom-built medical body
- Self-sufficient power and utility systems
- Integrated surgical facilities

Deployment Type	Field Medical Operations, Emergency Response, Remote Location Support
