

Mobile Thermal Printer

This compact and portable mobile printer is designed for on-the-go printing needs. It offers wireless connectivity for seamless integration with various devices and supports various printing media.

Overview

Compact Mobility for Professional Use

The AB-330M is a compact and portable thermal printer engineered for high-mobility environments. Designed for durability and ease of use, this device offers reliable performance for field applications including mobile police systems, logistics, and mobile point-of-sale operations. Its lightweight construction and wireless connectivity make it an ideal solution for professionals requiring on-the-go printing capabilities.

Key Features

Capabilities

Wireless Connectivity • Lightweight • Outdoor Ready • Long-lasting Battery

Primary Applications

Mobile Police Systems, Logistics, Mobile POS, Field Service, Direct Store Delivery
