

Mobile Tracked Jaw Crusher

This track-mounted jaw crusher is engineered for high performance and reliability. Its heavy-duty jaw crusher unit handles a wide range of materials, from aggregate to recycled concrete.

Overview

High-Efficiency Primary Crushing

The Mobile Tracked Jaw Crusher is a high-performance solution engineered for primary crushing and pre-crushing applications. Combining modern design with advanced materials, this mobile plant is built to handle medium to high-hardness natural stone, mining materials, and recycled building debris. Its compact, track-mounted design ensures excellent on-site mobility, effectively reducing operating costs while maximizing productivity for demanding industrial projects.

Key Features

Design Advantages

- Compact track-mounted mobility
- Advanced hydraulic control system
- Variable speed conveyor system
- Spacious feeding hopper
- User-friendly operator controls

Suitable Applications

Natural Stone, Mining Materials, Recycled Construction Materials, Primary Crushing

Performance

Operational Capabilities

21 Century
