

Mobile Trailer Mounted Generator Set

This mobile generator set is mounted on a trailer. It provides temporary power in remote locations or during power outages.

Product Overview

Mobile Trailer Mounted Power Solution

This trailer-mounted generator set is engineered for rapid emergency power deployment and long-distance transportability. It features a fully integrated containerized structure that provides excellent protection against rain, snow, and sun, making it ideal for harsh outdoor environments. Designed for efficiency, the unit includes an advanced damping system and sound-reduction materials to ensure smooth, quiet operation during extended use.

Technical Features

Operational Metrics

8 hours

Continuous Runtime

Temperature Control

The unit is equipped with a high-performance ventilation system and optimized heat radiation management. This ensures that internal components operate at ideal temperatures, even under continuous full-load conditions.

Key Features

Soundproof, Trailer Mounted, Weatherproof, High Efficiency, Rapid Deployment

Design and Safety

Transit Safety Features

- Synchronization tractor brake system
- Seven plug series taillight assembly
- Integrated steering and brake light indicators
- High-flexibility chassis for safe hauling

Environmental Standards

ISO 3744 Compliant
