

Mobile Twin Lattice Boom Crane

This heavy-duty construction machinery features twin lattice boom cranes mounted on a mobile platform. The cranes are designed for lifting and positioning heavy materials on construction sites.

Product Overview

Mobile Twin Lattice Boom Crane

This heavy-duty mobile crane features a twin lattice boom design, engineered for high-capacity lifting and precise positioning on large-scale construction sites. The mobile platform is equipped with multiple axles and robust stabilizing outriggers, ensuring superior stability during complex lifting operations. Its open lattice boom structure optimizes the strength-to-weight ratio, providing the durability needed for demanding industrial environments.

Technical Specifications

Build Quality

Heavy-Duty • Weather Resistant

Crane Type	Mobile Twin Lattice Boom Crane
Design Features	Twin Lattice Boom, Mobile Platform, Multi-Axle, Stabilizing Outriggers
Color	Orange and Gray
