

Mobile Well Testing Unit

This mobile well testing unit is built on a robust Iveco Daily 4x4 van. Equipped with off-road capabilities and specialized modifications, it ensures reliable performance in demanding field conditions.

Product Overview

Mobile Well Testing Solutions

This specialized mobile well testing unit is engineered for field-ready performance in demanding environments. Built on a robust 4x4 platform, it provides the mobility required to access remote operational sites. The vehicle features high-clearance suspension and heavy-duty components, ensuring reliability during critical well site testing operations.

Technical Specifications

Equipment Features

- Raised suspension for off-road terrain
- High-traction all-terrain tires
- Reinforced front bull bar
- Field-hardened exterior configuration

Drivetrain

4x4 All-Wheel Drive

Operational Capabilities

Well Testing, Off-road Capable, Field Operations, Mobile Deployment
