

Mobile X-ray Generator

This mobile X-ray generator features a movable arm and a control assembly mounted on a wheeled stand. It is designed for analytical and diagnostic applications and includes an X-ray generator and a control assembly.

Product Overview

Mobile X-Ray Generator Overview

This mobile X-ray generator is a versatile diagnostic and analytical instrument designed for high mobility and ease of use in clinical or industrial environments. Featuring an adjustable movable arm and a robust wheeled stand, it allows for precise positioning during operation. The unit integrates a dedicated X-ray generator, a stable column, and a user-friendly control assembly, making it an efficient solution for diagnostic imaging needs.

Physical Dimensions

Total Height	1800 mm
Base Height	480 mm

Key Features

Mobility & Design

- Movable arm for flexible positioning
- Wheeled stand for easy transport
- Integrated control assembly
- Stable column construction

Applications	Analytical, Diagnostic, Mobile Imaging
