

Modular Air Cooled Water Chiller

This modular air-cooled water chiller provides both cooling and heating capabilities. It features a compact design for easy installation and precise temperature control.

Overview

Modular Air Cooled Water Chiller

This modular air-cooled water chiller is designed for both cooling and heating applications, making it a versatile solution for commercial and industrial environments. It features an efficient heat exchanger and a reliable scroll compressor to ensure optimal performance. With its compact design and precise temperature control capabilities, this unit provides an energy-saving solution for various temperature regulation needs.

Performance Metrics

Cooling Capacity

130 KW
Capacity

Power Input

39.5 KW
Power Input

Technical Specifications

Refrigerant	R22
Compressor Type	Scroll
Key Features	Cooling & Heating, Efficient Heat Exchanger, Modular Design
