

Modular Circuit Breaker Signal Lamp

This is a modular signal lamp designed for circuit breaker indication and status monitoring. It operates at 230V with a low leakage current and complies with IEC standards.

Product Overview

Modular Signal Lamp

This modular signal lamp is designed for precise status indication within electrical power transmission and distribution systems. It is engineered specifically for circuit breaker applications, providing clear visual feedback on circuit status or fault conditions. Featuring a compact modular form factor, it integrates seamlessly into electrical panels and distribution boards.

Technical Specifications

Rated Operating Voltage	230 V
Maximum Leakage Current	1.6 mA

Compliance & Standards

Compliance Standards	IEC60947-5, EN 60947-5, CE
