

# Modular Connector Crimping Tool

Crimping tool designed for terminating modular connectors onto the ends of cables. It features precision crimping dies to ensure secure and reliable connections.

## Product Overview

### Professional Modular Crimping Solution

This modular connector crimping tool is designed for efficient and reliable termination of cables. It features precision-engineered crimping dies that ensure secure connections for professional applications. Designed with user comfort in mind, the tool includes ergonomic handles that improve control during repetitive tasks.

## Technical Specifications

### Design Features

- Ergonomic handle design
- Precision crimping dies
- Heavy-duty construction

### Markings

FOR COND • SPEC. 144 • PATENT

### Supported Connectors

RJ45, RJ11
