

Modular Electrical Socket 16A 250V

This modular socket is designed for connecting mobile devices and tools within industrial and civil switchboards. It is compatible with other modular products.

Overview

Modular Electrical Socket Solution

The CQP7 Modular Socket is designed for seamless integration into both civil and industrial electrical switchboards. It provides a reliable connection point for mobile devices, tools, and non-modular electronic equipment directly within distribution panels. Featuring a robust design with an integrated status indicator, this socket ensures safe and efficient power distribution in modular setups.

Electrical Specifications

Rated Voltage	250 V
Rated Current	16 A

Standards & Compliance

Certifications	CE
Plug Standard	France

Features

Key Features

- Modular installation design
- Integrated indicator light
- Suitable for civil and industrial switchboards
