

Modular Emergency and Night Light

This modular unit functions as both an emergency light and a night light. It can be disconnected from its wall plate for portable use and features a rechargeable battery.

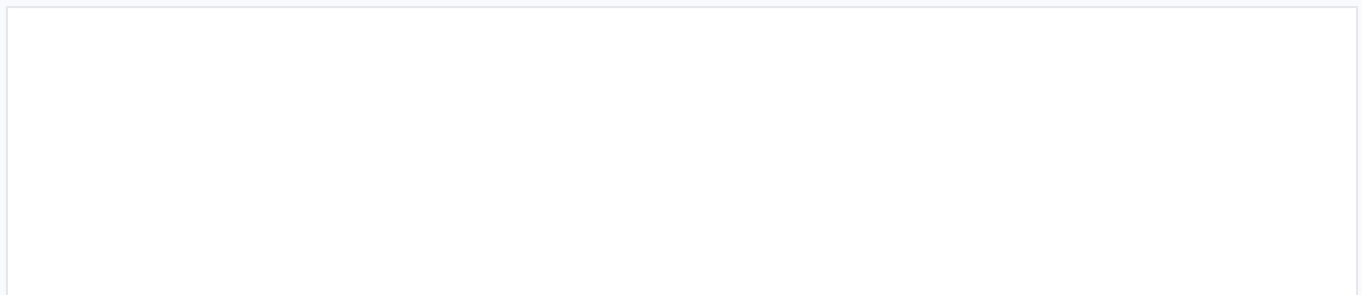

Product Overview

Dual-Function Modular Lighting

This versatile modular unit seamlessly combines an emergency light and a night light, providing essential safety and convenience. When connected to wall power, it functions as a reliable night light, while its detachable design allows it to be removed and used as a portable emergency light during power outages. Equipped with a rechargeable Li-ion battery, the unit features intuitive status indicators to show charging progress, making it a practical addition to any modern electrical system.
