

Modular LED Flood Light 50W-1000W

This modular LED flood light provides powerful and scalable outdoor illumination from 50W to 1000W. Its design ensures durability and efficient thermal management for reliable performance.

Product Overview

High-Performance Modular Lighting

This high-power LED outdoor modular flood light is engineered for versatility and durability, offering scalable power configurations from 50W to 1000W. Designed for demanding environments like sports fields and industrial facilities, it utilizes efficient 3030 LED chips to provide uniform, reliable illumination. The modular construction ensures straightforward installation and simplified maintenance, while its robust build guarantees long-lasting performance in harsh weather.

Technical Specifications

IP Protection Rating

IP66

Power Range

50W - 1000W

Input Voltage

100-240VAC

Power Factor

0.95 PF

LED Chip Technology

3030 LED Chip

Certifications & Compliance

Certifications

EMC, LVD, ROHS

Features & Benefits

Environmental Impact

- Environment-friendly
- No UV radiation
- No IR radiation

Installation & Maintenance

Easy to install and maintain with modular design for simple component replacement.
