

Modular LED Pendant Lighting System

This modular LED pendant lighting system operates at a safe, low-voltage DC24V. The system allows for easy installation and customization of LED lighting fixtures.

Product Overview

Modular DIY Lighting Solution

This modular LED pendant lighting system offers a flexible and creative approach to interior illumination. Designed for easy customization, the system allows users to assemble lighting fixtures simply by choosing placement and rotating the lamp heads. Operating on a safe low-voltage DC24V supply, it combines simplicity with modern design aesthetics.

Technical Specifications

Operating Voltage

24 V
Voltage

Power Type

Low-Voltage DC

Features

Installation

DIY • Modular • Tool-free

Design Capabilities

- Customizable layout
- Rotatable lamp heads
- Easy assembly
