

Modular LED Pendant Lighting System

This safe, low-voltage DC24V LED pendant lighting system features a modular design for easy assembly and customization. The system includes a suspension element, a connector for the light source, the LED light with a glass globe, and a power supply unit.

Product Overview

Modular DIY Lighting Solution

This innovative modular LED pendant lighting system is designed for effortless customization and installation. By allowing users to easily choose placement and rotate the lamp head, it offers a flexible way to decorate and illuminate any interior space. The system features a simple, user-friendly assembly process that functions similarly to installing a standard light bulb.
