

Modular LED Point Light

This modular LED lighting system is designed for easy installation and customization. It features safe, low-voltage DC48V operation and is suitable for various lighting applications, providing a sleek and modern aesthetic.

Product Overview

Modular LED Point Light System

This modular LED lighting system is designed for seamless integration into contemporary interior spaces, offering a clean and modern aesthetic. The system features a flexible, magnetic track configuration that allows for easy DIY installation without putting pressure on the ceiling. Engineered for safety and reliability, the connector has passed the UL1598 loading test, ensuring robust performance for various lighting setups.

Technical Specifications

Operating Voltage	DC48V
Single Connection Load Capacity	8 kg
One-Meter Track Load Capacity	30 kg
Safety Compliance	UL1598 Tested, Low Voltage

Installation & Features

Installation Method

Magnetic Track • DIY Compatible • Easy Click-in

Key Benefits

- Seamless decor integration
- Customizable cover options
- Low-voltage operation
- High load-bearing capacity
