

Moisture-Resistant LED Lamp

This moisture-resistant LED lamp is designed for reliable performance in damp environments. It is available in round and square shapes, with power options of 15W and 24W, delivering 1350Lm and 1920Lm of luminous flux, respectively.

Product Overview

Reliable Illumination for Damp Environments

This moisture-resistant LED lamp is engineered for durability in challenging, damp conditions, making it an ideal choice for bathrooms, utility rooms, and semi-outdoor spaces. Featuring an IP44 water-resistance rating, it ensures consistent performance and safety. Buyers can choose between round and square form factors with versatile power options to suit specific lighting requirements.

Technical Specifications

Key Performance Metrics

1350 Lm Luminous Flux (15W)	1920 Lm Luminous Flux (24W)	20000 hours Lifespan	80 CRI
---------------------------------------	---------------------------------------	--------------------------------	------------------

Color Temperature Range	2700K - 6500K
Operating Temperature	-20°C to +40°C
Switching Cycles	30000
