

Molded Case Circuit Breaker

Molded case circuit breakers are designed for circuit protection in industrial applications. They are available in 3-pole and 4-pole configurations with current ratings of 100A and 250A.

Product Overview

Industrial Circuit Protection

The NF-SS series molded case circuit breakers are engineered for robust circuit protection in demanding industrial environments. Available in both 3-pole and 4-pole configurations, these units provide reliable overcurrent protection for various electrical systems. Their versatile design makes them an essential component for maintaining safety and operational continuity in professional electrical installations.

Technical Specifications

Rated Current Options

100 A

Current Rating

250 A
