

Molded Pulp Seed Starter Pot

Pulp pots are suitable for starting seeds or housing small plants. The square planter is made from molded pulp material and features a textured exterior with vertical ribbing for added strength and visual appeal.

Product Overview

Sustainable Gardening Solution

These molded pulp seed starter pots provide an eco-friendly and biodegradable alternative for agricultural and gardening needs. Designed for durability and functionality, the pots feature a textured exterior with vertical ribbing to enhance structural integrity. They are the ideal choice for businesses focused on sustainable cultivation practices and nursery management.
