

Monitor Mainboard with Tuner Module

This monitor mainboard integrates video processing, input/output interfaces, and power regulation. It features a variety of ports including VGA, RCA, and RF input, along with a tuner module.

Product Overview

Integrated Monitor Mainboard and Tuner Solution

This monitor mainboard features an integrated tuner module, providing a robust solution for display signal processing. It is engineered to handle multiple video input interfaces and includes onboard power regulation for stable performance. Designed for high compatibility, this board is an essential component for monitor maintenance and display systems requiring versatile input options.

Technical Specifications

Integrated Features

- Tuner Module
- Video Processing Unit
- Power Regulation Circuitry
- Multi-interface I/O

Video Input Interfaces

VGA, RCA, RF Input
