Product Overview

Professional Mooring Rope Storage

This heavy-duty steel reel is designed for the efficient storage and deployment of synthetic fiber mooring ropes in demanding marine environments. Engineered for durability, it features a robust frame construction with reinforced side plates and tubular supports to handle large rope capacities. The smooth-rotating mechanism ensures easy winding and unwinding, significantly reducing friction and wear on your valuable mooring lines.

Technical Specifications

Compatible Rope Diameter

28 mm

Min Diameter

72 mm

Max Diameter

Rope Length Capacity

140 m

Min Length

220 m

Max Length

Mounting Specifications

Component	Specification
Screw Diameter	M16
Screw Quantity Options	8, 10, 12

Material & Finish

Steel with lubricated, anti-corrosive painting

Compliance & Quality

Surface Quality

Smooth Surface • Burr-free • Crack-free

Certifications

ABS, CCS, BV, DNV, NK
