

Morse Taper Shank Machine Chucking Reamer

Machine chucking reamers are designed with morse taper shanks. They are manufactured according to GB/T 1132-2004 and ISO 521:1975, MOD standards.

Product Overview

Precision Morse Taper Shank Machine Chucking Reamers

These machine chucking reamers are engineered for high-precision hole finishing and enlargement in industrial machine tool applications. Manufactured in accordance with GB/T 1132-2004 and ISO 521:1975 (MOD) standards, they ensure consistent dimensional accuracy and superior surface finish. Featuring a robust Morse taper shank design, these tools provide secure mounting and efficient power transmission for demanding metalworking tasks.
