

Morse Taper Shank Twist Drill Bit DIN345

This high-speed steel twist drill bit features a Morse taper shank for secure mounting. Conforming to DIN 345 standards, it is designed for efficient drilling in various materials.

Product Overview

Morse Taper Shank Twist Drill Bit (DIN 345)

These Morse taper shank twist drill bits are engineered for heavy-duty industrial and professional drilling applications. Conforming to DIN 345 standards, they feature precision-ground cutting edges and a helical flute design that ensures efficient chip evacuation and reduced heat buildup. The robust Morse taper shank allows for secure and precise mounting in machine tools, making them an ideal choice for drilling into steel, cast iron, and non-ferrous metals.

Technical Specifications

Suitable Materials

- Steel
- Cast Iron
- Non-ferrous metals

Standard

DIN 345

Shank Type

Morse Taper

Available Materials

M2, M2AL, HSS-CO, M35, M42

Performance Features

Performance Highlights

1 High Efficiency

Chip Evacuation

1 Reduced

Heat Buildup
