Product Overview

High-Performance Drilling Solutions

These long series twist drill bits feature a Morse taper shank, engineered for drilling deep holes across a diverse range of materials including metal, wood, and plastics. The Morse taper shank design ensures direct, secure, and accurate insertion into machine tool spindles, facilitating reliable performance in demanding environments. With options for both standard bright finishes and titanium nitride (TiN) coatings, these bits are optimized for general-purpose use or enhanced wear resistance in abrasive applications.

Technical Specifications

Suitable Materials

- Metal
- Wood
- Plastic

Key Features

Long Series • Deep Hole Drilling • Wear Resistant

Shank Type

Morse Taper

Material

High-Speed Steel (HSS)

Available Finishes

Bright, Titanium Nitride (TiN)
