

Mortar Bucket Trowel with Wooden Handle

This bucket trowel is designed for scooping and applying mortar and other materials. It features a flat steel blade connected to a wooden handle for a comfortable grip.

Product Overview

Professional Bucket Trowel

This mortar bucket trowel is engineered for efficiency and durability in masonry and construction applications. Featuring a flat, rectangular steel blade, it is specifically designed for easy scooping and application of mortar directly from buckets. The ergonomic wooden handle, reinforced with a metal ferrule, ensures a secure and comfortable grip during extended use.
