

Motion Sensor LED Light Bulb

This LED light bulb features an integrated motion sensor, automatically turning on when movement is detected. It is designed for energy efficiency and convenience, providing illumination only when needed.

Product Overview

Smart Motion-Activated Lighting Solution

This high-power motion sensor LED light bulb offers an automated, energy-efficient solution for industrial and commercial environments. The bulb features advanced radar sensing technology that detects movement within a 12-meter range, ensuring immediate illumination when needed and automatic shut-off 30 seconds after motion ceases. Designed to reduce energy consumption by up to 60% compared to standard LEDs, it is an ideal choice for warehouses, factories, and parking lots.

Technical Specifications

Detection Angle	120 degrees
Radar Sensing Distance	12 meters
Light Duration	30 seconds

Efficiency and Usage

Energy Saving Potential

60 %

Energy Consumption Reduction

Recommended Applications	Factory, Warehouse, Parking Lot, Hallways, Closets, Garages
