

Motocross Stainless Steel Muffler Exhaust Pipe

This stainless steel muffler is designed for motocross bikes. It provides enhanced performance and reduces noise while ensuring durability in demanding riding conditions.

Product Overview

Universal Motocross Exhaust Solution

This universal stainless steel muffler is engineered specifically for motocross, enduro, and dirt bike applications. It provides a perfect balance of enhanced exhaust flow and noise reduction, ensuring optimal engine performance in demanding off-road conditions. Constructed from high-grade stainless steel, it offers superior durability and corrosion resistance for long-term reliability.

Technical Specifications

The BM024SS features a 400mm total length and high-grade stainless steel construction for motocross and enduro applications.

Physical Dimensions

400 mm

Total Length

190 mm

Body Length

102 mm

Body Diameter

Model Number

BM024SS

Material & Construction

Primary Material

Stainless Steel

Key Features

- Corrosion resistant stainless steel body
- High-flow internal design
- Integrated silence/noise reduction technology
- Durable weld construction

Compatibility

Compatible Segments

- ATV/UTV exhaust systems
- Adventure motorcycles
- Off-road racing bikes

Vehicle Compatibility

Motocross, Enduro, Dirt Bike, Universal Fit
