

Motor Grader Blade 4T6511

This is a motor grader blade designed as a replacement part. It is made from boron steel and manganese steel.

Product Overview

High-Performance Motor Grader Blade

The 4T6511 motor grader blade is engineered for demanding construction and earthmoving applications, providing exceptional performance in grading and leveling tasks. Manufactured with precision, this blade features multiple bolt holes to ensure secure mounting and stability during operation. Its hardened steel construction is specifically designed to offer an extended wear life, making it a reliable choice for heavy-duty machinery maintenance.

Technical Specifications

Primary Applications

- Grading
- Leveling
- Earthmoving

Model Number	4T6511
Available Materials	Boron Steel, Manganese Steel

Design & Features

Key Features

Hardened Steel • Extended Wear Life • Precise Fitment • Multi-Hole Mounting

Customization

Color Customization	Multiple color options available upon request
