

Motor Grader

This heavy-duty motor grader is designed for road construction, maintenance, and earthmoving. It features all-wheel drive for superior traction and stability on various terrains.

Overview

Heavy-Duty Motor Grader

This heavy-duty motor grader is engineered for demanding road construction, maintenance, and earthmoving operations. It features a powerful engine and an articulated frame that provides exceptional maneuverability in tight spaces. With its hydraulically controlled blade and all-wheel drive system, it delivers superior traction, stability, and precision for shaping surfaces and creating smooth grades.

Key Features

Operational Capabilities

- Road construction and maintenance
- Earthmoving and material spreading
- Surface shaping and leveling
- All-wheel drive for superior traction

Model Identifier

BG33001
