

Motorcycle Accessory Mechanical Music Box Movement

Mechanical music box movement designed for integration into motorcycle-themed products. It features a rotating cylinder with pins that strike a comb, producing musical notes.

Product Overview

Mechanical Music Box Movement

This mechanical music box movement is designed for integration into motorcycle-themed accessories, gifts, or decorative items. The assembly features a precision-engineered rotating cylinder with pins that pluck a tuned comb to produce clear musical notes. It includes a winding key, gear mechanism, and a speed governor to ensure consistent musical playback, all mounted on a stable plastic base for easy installation.
