Product Overview

High-Performance Air Intake Solution

This aftermarket ram air tube set is precision-engineered for GSX-R 600 and 750 motorcycles manufactured between 2011 and 2013. Designed to channel airflow efficiently into the engine, these ducts are essential for maintaining optimal engine temperature and maximizing overall performance. Constructed from durable, high-quality plastic, this set offers a seamless fit that mirrors original equipment standards.

Compatibility & Fitment

Compatible Models	GSX-R 600, GSX-R 750
Model Years	2011-2013

Technical Specifications

Color
Black

Package Contents
• 2 x Air Duct Intake Tubes

Material
Polypropylene (PP)

Performance Features

- Key Performance Benefits
- Optimized aerodynamic airflow
 - Improved engine cooling efficiency
 - Enhanced throttle response
 - Precise OEM-style fitment
