

# Motorcycle Aluminum Alloy Wheel Rim

This motorcycle wheel rim is constructed from lightweight aluminum alloy for optimal strength. The multi-spoke design enhances rigidity and improves handling.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Motorcycle Rim

This high-performance motorcycle rim is engineered for riders seeking an optimal balance of strength and weight reduction. Constructed from premium aluminum alloy, the rim features a multi-spoke design that enhances structural rigidity and improves overall handling. Precision-machined for a perfect fit, it is an ideal upgrade for various CUB motorcycle models looking to improve both aesthetics and performance.

## Technical Specifications

Material	Aluminum Alloy
Rim Type	CUB
Customization	Color Customization Available

## Key Features

### Performance Benefits

- Lightweight construction for reduced rotational inertia
- Multi-spoke design for enhanced rigidity
- Precision-machined hub for accurate fitment
- Corrosion-resistant surface treatment
