

Motorcycle Analog Speedometer Instrument Cluster

This motorcycle instrument panel displays essential vehicle information. It features an analog speedometer, odometer, and indicator lights for turn signals, neutral, high beam, and oil pressure.

Product Overview

Professional Motorcycle Instrument Cluster

The CY-B95 is a robust motorcycle instrument panel engineered to provide clear, reliable vehicle data. Featuring a classic analog speedometer with a range of 0 to 140 km/h and an integrated odometer, this unit ensures essential tracking for riders. The durable black enclosure houses critical indicator lights, including turn signals, neutral, high beam, and oil pressure, making it a versatile solution for various motorcycle models.
