

# Motorcycle Analog Speedometer with Fuel Gauge

This motorcycle instrument integrates an analog speedometer and a fuel gauge. Indicator lights and an odometer provide additional vehicle status information.

## Product Overview

### Precision Dashboard Instrumentation

This motorcycle instrument cluster offers a reliable analog interface for essential vehicle monitoring. Featuring a clear speedometer range up to 160 km/h and an integrated fuel gauge, it provides riders with critical data at a glance. The compact design with a durable silver bezel and high-contrast face ensures easy integration into various motorcycle cockpits while maintaining readability.
