

Motorcycle Automotive Battery

This is an automotive battery designed for motorcycles. It provides reliable power for starting the engine and supporting the electrical systems.

Product Overview

High-Performance Motorcycle Battery

This automotive battery is specifically engineered for motorcycle applications, ensuring reliable power delivery for starting and essential electrical systems. Featuring a robust design with an integrated carrying handle, it offers ease of installation and durability. The unit is built to withstand the demands of motorcycle operation while maintaining consistent performance.

Technical Specifications

Model Identifier	40B24R(M)
Application	Motorcycle, Automotive

Design & Features

Handle	Yes
Terminal Location	Top
