

Motorcycle Brake Disc Rotor

High-performance motorcycle brake disc designed for superior stopping power and heat dissipation. The disc is designed to fit specific motorcycle models and offers a direct replacement for the original equipment.

Product Overview

High-Performance Brake Rotor

This high-performance motorcycle brake disc is engineered for superior stopping power and efficient heat dissipation. Featuring a specialized slotted rotor surface, it significantly improves wet braking performance while reducing brake fade during intense use. The lightweight, floating design ensures optimal alignment, reduces stress on the rotor, and enhances overall handling for a reliable, direct-replacement upgrade.

Performance Features

Rotor Design	Floating
Surface Finish	Slotted
Key Benefits	Enhanced Heat Dissipation, Improved Wet Braking, Reduced Brake Fade, Lightweight Construction

Compatibility & Installation

Fitment	Model Specific
Installation	Direct replacement for original equipment
