

Motorcycle Brake Disc Set

High-performance motorcycle brake disc designed for efficient heat dissipation and reliable stopping power. It features a slotted design for improved braking in wet conditions, precision machining for optimal flatness and balance, and durable construction for extended service life.

Product Overview

High-Performance Braking Solution

This motorcycle brake disc set is engineered for superior stopping power and reliable performance in diverse riding conditions. Featuring a precision-machined design, these discs ensure optimal flatness and balance for a smooth braking experience. The integrated slotted design enhances heat dissipation and maintains performance even in wet weather, while the durable construction ensures an extended service life for demanding applications.

Technical Specifications

Key Performance Attributes

- Enhanced wet weather braking
- Optimal flatness for reduced vibration
- Extended service life
- Reliable stopping power

Design Features

Slotted Design, Precision Machined, High Heat Dissipation, Balanced
